

Kidney Development Gene Expression Database

Overview of Kidney
Development

Kidney Development Data and RG-U34 chip information

The link below provides access to the data described in Stuart RO, Bush KT, Nigam SK Sci USA 98:5649-5654. 2001 in Excel format. We ask that all derivative work cite this r

Download Data

KidDev.xls. All arrays globally scaled to TGT = 2500.

The "Equalized" version of the kidney development data is here.

Software and Tools

We have tentatively identified 5 canonical groups of gene expression on the basis of a finer grouping of genes will become possible with additional data from the native kidney structures. As in the [PNAS paper](#), groups were identified according to the links below. In group members, genes with expression patterns "like" the those of a particular group y making the stringent threshold are included. These are marked as "1l," "2l," etc in the

RG-U34A Gene Lists

Rat RG-U34A chip information in Excel format with Entrez hyperlinks and group member gene. Similar files for other arrays are available. Alternate Rat RG-U34A chip information (blast bit score > 100) accessions in place of uninformative EST links. Similar files for z available.

Home

[Group1](#) genes: highest expression early in development

Gene Expression sites

[Group2](#) genes: highest expression in mid-embryogenesis

[Group3](#) genes: highest expression in neonatal life

Contact KDGED

[Group4](#) genes: increasing through embryogenesis into adulthood

[Group5](#) genes: low expression except in the adult

About KDGED

The data in the rightmost columns has been "compressed" to a maximum value of 3 for purposes.

Group1 and group1-like genes
